

DetaiBio SingleB[®] Antibody Discovery Platforms

Unique, Key Features

◆ Maximal Diversity for Maximal Possibility.

- **Maximize** CDR diversity by mining maximal B cell repertoires.
- Screening both **memory** B and **plasma** cells separately and individually.

◆ Multiple Species for Multiple Purposes.

Mouse

Humanized Mouse

Rabbit

Alpaca

Swine

Human PMBCs

Working on chicken, horse, ...

◆ Mature Natural, Mature Real.

- Screening **naturally matured** B cell repertoires for molecules of **mature** properties.

◆ Timeline-expediting.

- **From 1st shot to sequenced, validated hits**: as fast as **29** days (mouse), **49** days (rabbit), and **90** days (alpaca).

◆ Budget-friendly.

- **Home-made critical** reagents/kits and new customer **discount** put your budget **well under control**.
